

DBK Pellet Igniter

Illustration similar

The electrical DBK Pellet Igniter unit heats the air up to the ignition temperature.

The pellets or wooden chips ignite reliably within short time.

Characteristics

The DBK pellet ignition devices convince with the following features:

- Ignition of the pellets or wood chips within a short time
- High igniter outlet temperature, up to 700°C
- Low smoke and emission values during ignition
- High number of switching cycles - long life time

Dimensions: Length 130 mm, Diameter 25 mm

Heating Power: 230 V/430 W

Options

Individual dimensions and heating power configurations on customer's request possible.

DBK's knowledge of thermal management gives us the experience to guide and support you with your technical challenges - we can manage the complete project from concept to full production release.
